TARIFF FORMAT

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets** - When a tariff filing is made with the Ky.P.S.C., an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some sheets.)

2.10.7 Advanced Credit Management

A. General

Advanced Credit Management is a process whereby the Company will establish credit limits for new and existing Customers. The Company will utilize Credit Scoring for new Customers and Behavioral Scoring for existing Customers.

B. Credit Scoring

Credit Scoring will be provided through the use of third party credit reporting service for new service requests. The credit rating will determine the need for a deposit and establish a credit limit for monthly charges and toll usage. The credit limit will be based initially on a credit score assigned by a commercial credit reporting service and will be adjusted periodically as a result of the Customer's payment history with the Company.

The Customer will be informed of his or her credit limits during the application process. The account credit limit will appear on the first bill and on all subsequent bills. In the billing cycle in which a Customer's credit limit is automatically changed, changes in credit limits will be conveyed by mailed notices to the Customer.

2.10.7 Advanced Credit Management, (cont'd.)

C. Behavioral Scoring

Behavioral Scoring will establish credit limits on existing Customers based on the Customer's payment history with the Company. Customers will be notified of their initial limit amount and subsequent credit limit changes through credit limit notices mailed to the billing address. A behavioral score will be established and maintained on each Customer when the program is initiated and/or after service has been established. The behavioral scoring will be updated periodically, based on billing and payment behavior during the preceding twelve months.

D. Toll Blocking

When a Customer exceeds the established credit limit, a notice will be mailed to the Customer's billing address five working days prior to blocking being implemented. Access to toll calls, inbound collect, calling cards, travel cards, and third number billed to the block number will be blocked where facilities are available. Where facilities are available, a recording will advise the Customer that blocking has been imposed when dialing or billing attempts are initiated.

Once the Customer has been blocked, the block will only be removed if the minimum amount due is paid. Eighty percent (80%) of the account credit limit amount plus any amount over the credit limit must be paid. A restoration charge is not applicable when the Customer's toll service is unblocked.

SECTION 2 - TERMS AND CONDITIONS, (Cont'd.)

2.11 Deposits

2.11.1 The Company reserves the right to examine the credit record of the Customer, using any lawful sources for determining credit standing. If the Customer's financial condition is unknown or unacceptable to the Company, the Customer may be required to provide the Company with a security deposit which the Company may apply against overdue charges. The amount of the security deposit shall not exceed two-twelfths (2/12th) of the actual or estimated usage but may vary with the Customer's credit history and projected usage. The Customer shall be apprised that after one year of service the Account shall be reviewed, and in the event that all amounts due have been paid within the terms and conditions of this tariff, the deposit shall be refunded in full. If the deposit is held more than 18 months, it will be recalculated based on actual usage. If subsequent payment or usage patterns change, the Company may request an increase in or resubmission of the security deposit as appropriate. The Company may also require a security deposit before service is restored (along with the payment of overdue charges) from the Customer whose service has been discontinued for nonpayment of overdue charges. Such security deposit may be based on a new credit history (taking into account the discontinuance of service) and estimates of usage.

2.11.2 Interest on deposits held will be paid annually at the interest rate prescribed by KRS 278.460, unless the Customer's account is delinquent on the anniversary date of the deposit. Interest may be paid by refund or credit to the Customer's bill.

2.11.3 The fact that a security deposit has been made in no way relieves the Customer from the prompt payment of bills upon presentation.

2.12 Advance Payments

The Company reserves the right to require an advance payment from the Customer. The advance payment shall be in an amount equal to or less than estimated installation charges plus two months' estimated billing.

2.13 Interruption of Service

Credit allowances for interruptions of service which are not due to the Company's testing or adjusting, to the negligence or other wrongful act or omission of the Customer, or to the failure of channels, equipment and/or communications systems provided by the Customer, are subject to the general liability provisions set forth in this tariff. It shall be the obligation of the Customer to notify the Company immediately of any interruption in service for which a credit allowance is desired by the Customer. Before giving such notice, the Customer shall ascertain that the trouble is not within his or her control, or is not in wiring or equipment, if any, furnished by the Customer. Interruptions caused by Customer-provided, or Company-provided automatic dialing equipment are not deemed an interruption of service as defined herein since the Customer has the option of using the long distance network via LEC access. For purposes of credit computation, every month shall be considered to have 30 days. For purposes of credit computation, every month shall be considered to have 30 days and every day 24 hours. For all Company services no credit shall be allowed for an interruption of continuous duration of less than twenty-four hours. SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (Cont'd.)

3.2 Calculation of Distance

Usage charges for all mileage sensitive services are based on the airline distance between the rate center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the applicable rate centers as defined by Telecordia (formerly Bellcore) and on file with the FCC in AT&T FCC Tariff No. 20, in the following manner:

Step 1 - Obtain the "V" and "H" coordinates for the rate center of the originating and the destination points.

Step 2 - Obtain the difference between the "V" coordinates of each of the rate centers. Obtain the difference between the "H" coordinates.

Step 3 - Square the differences obtained in Step 2.

Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating rate centers of the call.

$$\sqrt{\frac{(v_1 - v_2)^2 + (h_1 - h_2)^2}{10}}$$

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)

3.3 Timing of Calls

Billing for calls placed over the network is based in part on the duration of the call.

3.3.1 Timing for all calls begins when the called party answers the call (i.e. when two way communications are established). Answer detection is based on standard industry answer detection methods, including hardware and software answer detection.

3.3.2 Chargeable time for all station-to-station calls begins when connection is established between calling party and the called party and ends when the calling party hangs up thereby releasing the network connection. If the called party hangs up but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the network, or by an operator.

(T)

(T)

3.3.3 Minimum call duration for billing purposes is one minute unless otherwise specified in the individual rate schedules of this tariff.

3.3.4 Calls are measured and billed in one minute increments unless otherwise indicated in this tariff. Any partial minute is rounded up to a full minute.

- When the Customer selects a shorter term; or

- When the Customer negotiates the term plan for a longer term;
- When the Customer moves to a jurisdiction where the Company is prohibited from offering service;
- When the Customer changes plan prior to 60 days of service;
- When the Customer returns to the Company as a result of a Winback program;
- When the Customer reduces their term monthly spend level one level during a billing cycle; or

At the expiration of the term commitment, the Customer will continue at the same commitment and usage rate unless they notify the Company of a change to a different term commitment/minimum usage guarantee or to a different plan. If the Customer continues without notifying the Company of any changes, the Customer will remain liable for the MSL to which they were originally subscribed.

4.5.3 Residential Personal Toll Free Number

A. General Description

Residential Personal Toll Free Number is a toll free service that provides a telephone number for Residential Customers to receive calls. Residential Personal Toll Free Number is available to Customers with lines presubscribed to the Company's service. This service allows presubscribed Customers to pay for incoming calls made to a personal toll free number. Incoming calls to that toll free number terminate at a telephone number designated by the Customer, subject to limitations indicated below.

Residential Personal Toll Free Number calls can originate from all intrastate locations, including locations that are jurisdictionally local to the originating exchange. Residential Personal Toll Free Number call termination is available to all domestic locations served by the Company. The Customer-designated termination number may be any valid telephone number except numbers designated by the North American Numbering Plan as toll free (800, 888, 877, etc.), 500, 700, 900, 976, public or semi-public pay telephone numbers and directory assistance (411 and NPA-555-1212) numbers.

(T)
(T)

Residential Personal Toll Free Number is free to the calling party. All charges are billed to the Residential Personal Toll Free Number Customer, based on the per minute usage rate indicated below. A Monthly Recurring Charge applies to each account subscribed to Residential Personal Toll Free Number, in addition to the applicable usage charges and per call charges specified below.

The Residential Customer who discontinues the Company's presubscribed service, or whose service is discontinued by the Company in accordance with the provisions in this tariff, will also discontinue, or have discontinued by the Company, their Residential Personal Toll Free Number option.

SECTION 4 - MISCELLANEOUS SERVICES, (CONT'D.)

4.5 Toll Free Services, (Cont'd.)

4.5.3 Residential Personal Toll Free Number, (cont'd.)

B. Basic Option

To call the Customer's designated terminating number, the Customer must dial the Company-designated toll free (800, 888, 877, etc.) terminating number and 4-digit Personal Identification Number (PIN) that has been assigned to the Customer's presubscribed residential telephone number. Subsequent to the initial establishment of the account, the Customer may change the termination number to an alternate telephone number. Because Residential Personal Toll Free Number Customers share access on the same toll free access number based on PIN, use of the toll free number may be lost if service is terminated. Customers may have multiple toll free numbers per account. Call detail is available on the Customer's monthly statement at not additional charge.

Calls will be billed in one (1) minute increments after an initial minimum call duration of one (1) minute. Any partial minute will be rounded up to the next full minute. Residential Personal Toll Free Number may not be assigned or transferred for use with service provided by another carrier.

Distinctive Ring and Area Code Selection are not available with Residential Personal Toll Free Number. Customers must have touch-tone dialing to complete the toll free call. Minimum Service period for Residential Personal Toll Free Number is one month.

C. Plus Option *

Plus Option allows Customers to have calls routed to up to ten (10) different terminating numbers, using a single toll free number. The first terminating location defaults to the Customer's presubscribed telephone number. The Customer can specify the terminating numbers associated with each of the Residential Personal Toll Free Number Plus 4-digit PINs.

* The Plus Option is not available to new Customers.

The IntraLATA Carrier Sign Up Promotion is offered to new and existing business Customers who presubscribe to the Company's intraLATA service through Company-designated sales channels for Company-designated marketing campaigns. The eligible Customer will receive a one-time credit to offset the costs associated with changing a presubscribed intraLATA carrier.

SECTION 6 - OBSOLETE SERVICE OFFERINGS, (CONT'D.)

6.1 Business/Residence Line Toll Free Service

Business/Residence Line Toll Free Service provides for the termination of inbound toll-free calls to one-party exchange access lines. The minimum service period for Business/Residence Line Toll Free Service is one day.

6.1.1 Toll Free Number Assignment

Toll Free Number Assignment provides for the assignment of a single ten digit toll free number (i.e. 800-XXX-XXXX). Toll Free Number Service allows for but does not require the Toll Free Service Customer to use one toll free number. Toll Free Number Service can be selected for an area by specifying the desired area of service, as described in 6.1.2 following. The assigned toll free number will terminate to an exchange access line.

6.1.2 Area of Service

Area of Service defines the geographic location from which the Toll Free Number Service Customer desires to accept calls for a given Toll Free number. An exchange access line is required for termination of Toll Free Number Service traffic. The desired Area of Service must be specified by Customer at the time Business/Residence Line Toll Free Service is ordered.

6.1.3 Variable Call Destination

The Variable Call Destination feature provides for multiple terminations of Business/Residence Line Toll Free Service when Customer specifies an Area of Service. This allows for the assignment of one toll free number with termination to an exchange access line.

6.1.4 Determining Usage Charges

Monthly usage charges are calculated separately for each exchange access line termination. There is a minimum usage charge based on the average completed call of 30 seconds per completed call for each billing period for each rate period. Therefore, if the average duration of all such calls is less than 30 seconds, the total use equals the number of calls multiplied by 30 seconds. Usage charges apply as follows:

- A. For each exchange access line termination of a given toll free number, the total chargeable hours for each rate period for each termination is the greater of (1) or (2) following, rounded up to the nearest tenth.
- (1) Determine the total actual Business/Residence Line Toll Free Service hours associated with a given toll free number and exchange access line for each rate period (chargeable time for each call) or;
- (2) Determine the total equivalent hours associated with a given toll free number for the exchange access line termination used for each rate period by applying the minimum average time requirement of 30 seconds per call (1 call X 30 seconds).
- B. Using the total chargeable hours per rate period determined in 1. preceding and the table of hourly rates, multiply the hourly rates(s) in the appropriate usage tier by the number of hours used in each usage tier. The total charge is the sum of all the usage.
- C. The charges for a fractional part of a month will be a proportionate part of the monthly recurring charge based on the actual number of days service is provided, plus the usage charges applicable for that month. Every month is considered to have 30 days.
